Digital Literacy Project Report

Name: SOORYA KIRAN D
Register Number: 25BAS10045
Branch: B.Tech Aerospace Enigineering
Year: 1st Year
Course code: CSE0001

Date: 30-03-2026

Introduction

Digital literacy is an essential skill in today's technology-driven world. This project helped me understand how to use digital tools effectively, communicate professionally, and stay safe online. It consists of five tasks that focus on awareness, digital presence, platforms, communication, and cyber safety.

Task 1 – Digital Literacy Infographic

I created a digital literacy awareness infographic using Canva. The infographic covers important topics such as digital literacy, useful tools, safe internet practices, and professional online presence. I used simple visuals and icons to make the design clear and engaging. This task improved my creativity and understanding of presenting information effectively.

Task 2 – Digital Portfolio

In this task, I created profiles on GitHub, LinkedIn, and Kaggle. These platforms help in showcasing projects, networking, and skill development. I plan to use them throughout my academic journey to build my professional presence.

Task 3 – Platforms

I explored coding platforms by solving a beginner problem and created a Google Form for digital literacy awareness. These tools are useful for improving problem-solving and collecting data.

Task 4 – Email Etiquette

This task helped me understand how to write professional emails and maintain proper online communication. I also created a checklist for responsible social media use.

Task 5 – Cybercrime Awareness

I studied cybercrime and learned about online frauds such as phishing. This task helped me understand how to stay safe online and protect personal information.

Conclusion

This project improved my digital literacy skills and helped me understand responsible use of technology. It will be useful for my academic and professional growth.
